

The Essentials Volume III

-Julian DeVante

This E-Book is dedicated to my Sisters, Brothers and Children everywhere.

Our entire Human Family

May God's Blessing be upon you all.

In this third version of 'The Essentials' I attempt to convey hidden aspects of our Realm and subtle forces that act upon us –

It is my sincere wish that your *Awareness* in Truth grows stronger.

The Cross: The hidden meaning

The Cross is a symbol and reminder for us of our Lord Jesus Christ crucifixion – his sacrifice for our salvation.

The Cross contains a *hidden* secret – the Cross is also an ancient symbol of transfiguration – of *rebirth* – *from earthly Man to Divine Being*

Instead of moving horizontally from Birth to Death; in bondage to the Temporal (Time); One can *elevate* One's Consciousness and move into the 'deathless' – the 'Timeless' – move into the *Eternal*

It is an unceasing reminder of Freedom of Choice.

We are in bondage

The greatest prison: Mind – When one escapes this prison – all other prisons and imprisonment disappear.

In the words of OSHO: 'Mind is a beautiful instrument...' when you are its Master.

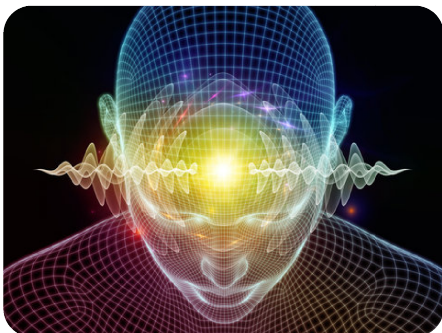

- Thinking and Logic – problem solving – survival requires the use of mind – When used rightly it is not your enemy. 'The problem arises when you *identify* with it'

The so called 'normal' state of mind is unawareness – we are usually in and out of partial awareness

The mind is *cunning*. One of its main *strategies* is to keep you in constant *distractions* –

You are torn apart - constantly pulled between past and future – never *here - now*

Why is this so? – Because in your unawareness, the instrument (mind) assumes the position of master.

∞

The circular nature of mind

In 'the essentials volume I' we talked about the 'Mind' – about various aspects of Mind and 'Mind-Space'

Fragments of Mind

- What is **Math**? Is it an abstract method invented to try to codify/quantify the objective world in a standardization of logical rules?
- What is **Science**: There is the dictionary definition – but is it not a system of techniques of measurements developed to try to analyze and ascertain knowledge of the objective world?

Let us try to make sense of this

- What is **knowledge**? Is it not an accumulation of a set of information regarding a particular topic or thing?
- The information making up a set of knowledge can be factual or fictional – not always true or correct
- What is **information**? Is a supposed fact or collection of supposed facts regarding a thing or topic
- What is **Philosophy**? Is it not thoughts and ideas on a topic or thing? An attempt to look into a problem or situation.
- What is **logic**? Is it not a progressive method – an attempt to use thinking to organize information in various ways to reach an outcome – that outcome may be positive or negative – The motive may be to solve a problem or to organize information in a clear and distinct manner.
- What is **reason**? Is it not using the mind's abilities to attempt to bring understanding to a situation, topic or thing?
- What is **understanding**? Is it not one's personal collection of ideas/information on a certain situation, topic or thing?
- What is **comparison**? Is it not, looking at similarities and/or differences between one's own information on a certain situation, topic or things?
- What is **intellect**? Is it not the capacity and ability to utilize information with clarity and agility?

Knowledge, Information, Philosophy, Logic, Reason, Understanding, Intellect – **These are the tools of the Mind.**

A simple fact: These '*tools*' always work with and is based on the '*unknowable*'.

What does this mean? – It means that the '*tools*' of the mind – no matter which tool it is – *is always based on information*. When that information is presented to the mind and processed using any of *mind's tools* – A certain amount of **Time** has passed; hence the information is essentially from the *past* and is no longer 'based on Reality as it is *NOW*' –

∞

A simple example: You take a sip of your hot coffee. You note to yourself that it taste really good – then you remember that yesterday at a different café – the coffee tasted better. You take another sip and think – this coffee isn't that good after all and it's a bit cold.

What has occurred? The Mind had employed the tool of '*comparison*' and in so doing – time has passed – the coffee has changed state from hot to less hot – this alters the taste even more.

This is a simple example trying to explain a subtle phenomenon. The essential of this is that *mind takes time* to process information – no matter the tool it employs. By the time it has finished processing, making a determination or coming to a conclusion – *time has passed and reality has changed*.

Another example: You are in a sword fight with a Ninja – She walks in a circle around you looking for an opportunity to strike you with her sword – as she does this you try to think what could be her next move – as you are engaged in thinking – her sword is thrust through you – within a split second.

Thinking takes time – hence; 'with mind' you are always in the past – you are never '*here now*'

Life keeps moving on and Mind keeps being stuck in the past – always and forever.

When one looks deeply into this; one begins to see the *circular nature of the mind* – Something is based on something else and that something else is based on something else – With mind there is no '*knowing*'.

Mind is always fragmented. But why is it so?

Because Mind is a tiny aspect of Consciousness – an aspect that is asleep.

From a certain perspective, it can be said that your conscious '*energy*' is '*tied*' up in a fragmented system called the Mind. The truth is – it is not a fragmented system – *it is a fragmented space* –

Fragmented meaning 'not whole' – not in 'Unity' – 'Your Mind-Space' is in disunity, not integrated not unified.

This perspective allows one to begin to understand why we only experience '*one*' thought at a time and can only focus on '*one*' thing at a time.

Why we cannot see '*all*' the thoughts at once or '*all the things*' at one.

Even at our Optimum – Peak Efficiency – the information we receive from our senses and processed by the Mind always require Time; hence, we can never perceive the '*Truth*' of our '*Reality*' because we are always stuck in the past.

The fact is: With Mind – even 'a second of time' or 'a fraction of a second in time' – translates to thousands or even hundreds of thousands of years in Reality – in *Eternity*

What is Eternity

Eternity is the '*Timeless*' – What occurs or exist '*in between time*' – where time does not exist. In that space is the '*timeless*' – it cannot be translated directly into information; hence, it is a concept mind cannot directly comprehend but we can try to convey it by attaching *time* to it; so I say "*in the space between the 'nano-seconds' of Time – a span of hundreds of thousands of years of Eternity exist –*

What does this mean? – it means that we live in *illusions* created by our mind utilizing information from what appears to be *primitive mechanisms* – the known 5 senses.

The very nature of mind prevents us from experiencing the real Reality as it exists.

Even our fastest light based processors utilize a 'clock source' for synchronization. It will still also be '*stuck in Time*'

There are very deep implications to this fact:

- The real Life/Reality can go through hundreds of thousands of years (or more) of change in-between a single second of 'our mind's' perception of time
- With mind – we are always in the dark akin to *sleep*
- The more we move away from mind – they more the real Reality comes into '*view*'
- The more we move way from mind – the more we come closer to 'Truth' – *what is*.
- Conversely – getting more '*entangled*' with Mind – drains our vital energy, deepens our sleep and brings more darkness into our Life.
- Redirecting more of our energy from mind and directing it towards *Consciousness* brings us closer to Eternity.

So – Mind – therein lies the problem – or not –

It depends how long we wish to be *asleep* playing with toys. It is all up to you.

Some of us enjoy playing with our toys – with our *Mind* and with the *tools* of our Mind – for a child it is fun – for an Adult – it is *futile*.

Deeper in the 'Mind-Space' there exist the 'Reflection Sphere'.

I cannot help with this – inquire with the Gnostics

Deeper still, exist the 'Abyss'

Yet again, I cannot help with this – inquire with the Gnostics

Duplicate Inner Senses – Your True Faculties

For every known outer sense there exist a corresponding inner sense. These inner senses allow one to experience the inner world – *the inner cosmos*. The journey to one's inner cosmos is done in aloneness – no one can take you there – *it is a private journey*.

You are leaky – leaking

The modern human being is leaking energy in many ways. He/she lives at the *minimum*

- Most of our energy leaves us through our eyes. The more we use our eyes, the more energy leaves us – almost 80% of our energy is wasted by devices (TV/Tablets/Mobile Phone etc) addiction. This does not mean we should be closing your eyes all the time, if we are serious about spiritual growth – we should consider- *moderation*.
- The other large leakage is over-indulgent in sexual activities – if it's just sex. Remember, *true - real Love* between a Man and Woman leads to *energy gain* – not loss.

Do not misunderstand – I am not *against* sex. I am only trying to share with you how you are kept at the minimum of energy – **This situation prevents your spiritual growth because real growth requires much energy.**

It is a cunning trap.

In-fact; this is why porn is freely available on the internet – *it is a Satanic Principle at work.*

Celebration: echoes of abundance and thankfulness

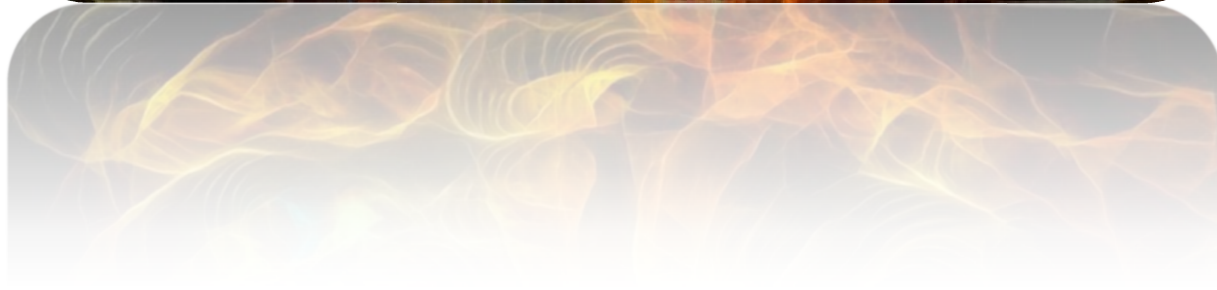

In the Bible and other sacred books – There is much talk of celebration, feasting and fellowship.

In today's world, the so called 'authorities' want you to be isolated, tracked, traced, surveilled and mind-controlled while more and more restrictions are placed on you and your family. Basic rights and freedom are suppressed.

- The so called 'authorities' are in *direct conflict* with what our Creator God wishes for us – A life of true freedom and abundance. A life of Joy and happiness, of prayer, laughter and fellowship.
- This realm is vast and abundant; there is resources and land plenty for each individual and her/his family.

Know this: *if poverty, misery and suffering engulfs the multitudes of men and women then criminality and darkness has corrupted those that 'rule over us'. By some kind of force, invisible and/or visible, mankind has fell into the yoke of evil.*

It is up to us individually to take steps to correct what has been imposed on us without our consent and knowledge.

The Enteric connections

Water – Elemental Life

- Water is *one* of the main *interface* to the power source originating from the *Etheric* – it is the main source of power for your Vessel. *It is that and much more.*
- Breathe in –

- Scientist say that we breath in Air or Oxygen – This is not entirely true – ‘Air’ is only a *transport* – a carrier for ‘*Prana*’ – The ‘Vital’ force , *the essential*; without it, our Vessel would cease to function.
- Our Vessel(*body*) take in this ‘Vital Force’ and also a *multitude of energies* from various sources – some known – some unknown – It alters and combines those energies into various and *new combinations* that cannot be explained in words – these *new creations of energies* are utilized by various energy fields *within* and *around your Vessel*.
- Breathe Out -

- When we *breathe out*, some of the *new creation of energies* travel on the *outward breathe* and is ‘breathed in” by other Human Beings, plants and animals – It is *transference* – a sharing; hence, *everything is ‘directly’ affected by you.*

Your present ‘inner nature’ affects ‘all’

If you are prayerful: You will put out ‘that’

If you are hateful: You will put out ‘that’

When large numbers of Human Beings are in pain, suffering, agony then that is what is ‘put out’.

This is why the Satanist seeks to always have suffering on a mass scale. To constantly inflict *trauma*.

The point here is – We have it in our hands to thwart them – to stop them – to turn things around.

To turn ‘it’ towards the Light.

You are not powerless. Quite the opposite -

8

Karma – An aspect of the Great law

Karma and Sin refers to the same thing – Different names for the same thing.

“Karma is not a reward and punishment system” – Sadhguru

Karma – It is about “Right Action” - “Right Action is action done in ‘full awareness’

It can be asked: If a psychopath is murdering someone in full awareness does he/she incur Karma?

Never forget the first Law: The Golden Rule - Do no harm

Murdering is ‘Wrong Action’ – Yes, Karma is generated/created

Think of it like this – In my engagement with activity:

-Am I breaking the Golden Rule?

-Is my engagement with this activity or object(s) in ‘full Awareness’?

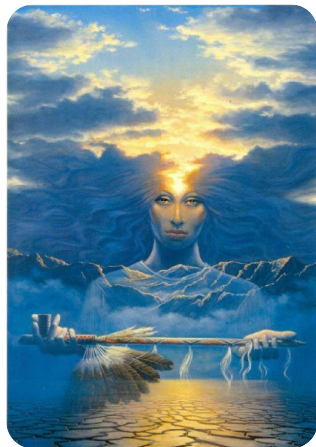

When one engages in ‘wrong action’ - *bondage is created between you and the other* – between you and this Prison. **Invisible chains will bind you to this Prison.**

Right Action weakens the chains of your bondage – Engaging in ‘Right Action’ consistently eventually sets you free.

The gods

As we exist here on ‘earth’ so does countless ‘gods’ (small g) exist in their own plain of existence - a slightly elevated space outside our prison.

They do watch us in amusement and in disgust both. In the old days of the prison, they did travel here and interfere in our affairs. After the ‘fallen ones’ came and there was the battle with the ‘Advanced Beings’ taking care of this prison – the ‘gods’ were prohibited from visiting and interfering with the affairs of Human Beings.

8

The Dynamic connection between ‘Freedom – Mind Control – Karma – Evil’

- **Freedom is God Given** and have nothing to do with other Human Beings or systems (King/Queen, Leader, Government etc)
- **Freedom of Choice** is our inherited right from our Creator God and is fundamental to *the sentient nature of our existence* as Human Beings
- **Karma** is ‘Bondage’ created by ‘Wrong Action’
- **Mind Control** (Techniques and Technologies) is a nefarious attempt to ‘direct, lead or control’ an individual (or group of individuals) without their knowledge or consent.

Question: If a person is being Mind-controlled to commit a wrong act – do they incur Karma?

Answer: It depends of their *awareness* of the act –Usually, No. However; the person or group of people using Mind Control to influence or control the individual will *incur* Karma/Sin.

Question: What if an automated system such as Artificial Intelligence (A.I) is used to Mind-Control, torture or harm individual(s) ?

Answer: The individuals that are responsible for the system’s creation (authorized), that funded, operated or enforces the system – Anyone maintaining, utilizing or administering the system – All will *incur* Karma/Sin.

Suppressing an individual’s ‘Free Will’ using technology or techniques:

- The individual(s) becomes almost a ‘bio-robot’
- The ‘controller(s) incur of Karma/Sin – Bondage to the individual(s) and to this prison

***Prolonged use of Mind-Control** on an individual(s) goes deeper into ‘the Great law’ – into what we call – Evil – Why?

Because an individual’s Consciousness *powers various internal and external fields* that protect the individual’s physical Vessel.

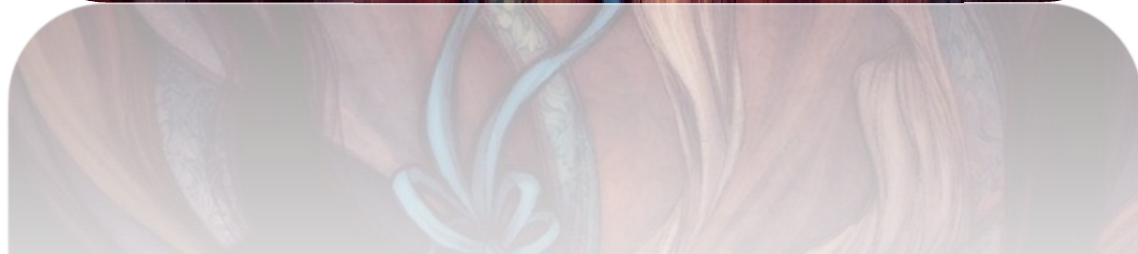

Mind-Control weakens these fields - it affects the effectiveness and strength of the Vessel’s true Consciousness connections.

There are entities in the ‘bodiless realm’ that sense weaknesses in an individual’s protection filed – those entities can ‘relentlessly’ attack the individual’s Vessel – **This does a few things:**

- These attacks can appear as disease, illness and sickness
- Can lead to a pronounced increase of misery and misfortune for the individual(s) targeted

∞

Enlightenment

When one becomes enlighten – it is not one's physical Vessel (body) that this happens to. This happens to one's Mind-Space. *Enlightenment has nothing to do with the physical.*

- The *quality* of the technology connection to one's Vessel changes and in turn it alters how the laws of this realm affects one's Vessel
- For the Enlighten One, the Mind-Space is still encased in its field until the death of the Vessel – At that point, the encasement is dissolved and an explosion of Consciousness occurs. A new Being is born in the *real-existence*.

The Kingdom of God

Where is the Kingdom of God?

Is it in another Realm? - In the sky? Or some other place?

One day, you will come to know that – you do not perceive the Kingdom of God, despite it being *right Here – right Now* because you are *not yet born – this 'physical' birth is not your real birth*.

It is not a place one can travel to – one must be born into it – And until all darkness *disappears* from your mind-space – you will not know it

Polish Your Mirror

In the dark night, the Moon is *reflected* in the *waters* of the pond.

So too is the Divine reflected in you. *You are living water –*

The Mystic OSHO once said – “Polish your mirror” ...much dust has gathered on it, every moment more and more dust. A perfectly clean mirror yields a near perfect reflection in all its brilliance and illumination – in all its glory.

A dusty mirror reflects very little – it all depends on how much dust we allow to gather.

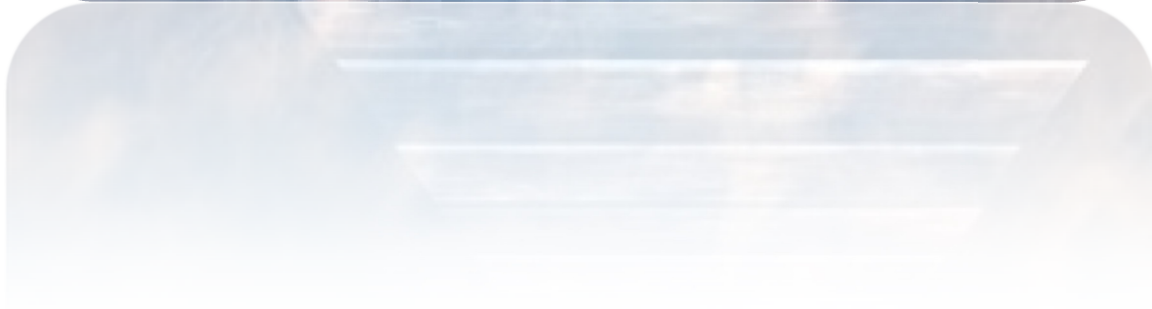

So, what is dust? You can think of it *as strongly held beliefs, ideas, thoughts* – anything not rooted in Truth. *Thoughts and ideas that keep you in bondage.*

Breaking with the past – not projecting for the future. **Being Here – Now.** Being fresh and clean each moment is clearing the dust – polishing the mirror. *Be in awareness each moment.*

Noteworthy Reference:

- The Holy Bible: Matthew 6:10 “...on earth as it is in Heaven”
- The Emerald Tablets: “As above so below”

The Hidden

In Existence, there is no 'No' or 'Not'. There is only 'Is', 'Am', 'Is-ness', or 'Am-ness'.

What does this mean? – It means when you pray and say “ I want *no* suffering” or “let there be *no* suffering” – You are really saying “I *want* suffering”, “let there *be* suffering”.

In Existence – **only “Yes” exist** – “No or Not” does not exist. *An important fact to be aware of.*

The Dark Magicians

The dark magicians are those that follow and practice Satanism. They currently hold the reins of power in this prison. They *may* see themselves as worshippers of truth and light but unfortunately, they have been led astray by dark forces operating in-between realms.

The dark magicians conspire and create dark agendas; which include:

- Enslavement of the Divine Female & Divine Male
- Satanic Ritual Abuse
- Ritual Sacrifice
- Blood Magic
- Harvesting your vital fluids from your body(organs/glands) –without your consent or knowledge

Many people living in this 'world' (prison) are not aware of the true power structure that controls this prison on the inside.

This prison is controlled by a Priest Class – the Dark Magicians

- The militaries, secret service, politicians, media and other institutions take orders from the Priest Class
- The entire prison is controlled by the Priest Class – It is one global system of control – everything we see is 'programming' for our minds.
- The real way things work has been kept hidden from us
- There are various technologies embedded in our bodies and the physical environment that work in conjunction with a massive technological system of control – Computer based - run by the militaries of the world. – Research: Sentient World Simulation
- Human Beings are influenced, manipulated, programmed, controlled and experimented on by a vast array of technologies, techniques and secret projects – all for secret agendas – secret because *they* are not in our best interest

It is in our own best interest and the interest of our families and children to look into this and attempt to find the Truth. **Sadly, we are not truly free.**
